

Saturday; Keith finished trimming the pear tree - north side of yard - some dogwoods, fixed some garden areas. We took over the ambulance was at Mrs. Shirley - She had fallen & the nurse came to give her a bath etc. & found her on the floor in the kitchen - Hospital here checked her & sent her to Linton - The doctor was out of town so Dr. Smith checked but would not give any details other than came in today, will find out her injuries maybe by tomorrow.

Saturday P. M. Keith & I went to the farm - He put ^{some} dirt under side shelter to backhouse - maybe I can kill the ants & get it all leveled. It takes a long time for me to get almost nothing done. I get slower by the day or week. Keith also dug off spillway where the beavers had dammed. Sam had dug off spillway earlier this morning. The beavers are very busy creatures or either there are lots of them.

From time to time we see turkeys that have been put out by the government. Sam said 3 one morning & 5 that evening at the farm. Then a few days later he said he saw 13 going from set out pen in north field over to Herbert's place (Deanna's place) They could be a pest if many are raised - They were eating corn.
