

Saturday, Keith finished trimming the pear tree –north side of yard. Some dogwoods, fixed some garden areas. We look over [and saw] the ambulance at Mrs. Shirley's. She had fallen and the nurse came to give her a bath etc. + found her on the floor in the kitchen. Hospital here checked her + sent her to Tifton. Her doctor was out of town so a Dr. Smith checked but would not give any details, then hers came in today. Will find out about her injury maybe by tomorrow.

Saturday p.m., Keith + I went to the farm. He put some sevin out under the side shelter of the packhouse. Maybe I can kill the ants + get it all leveled. It takes a long time for me to get almost nothing done. I get slower by the day or week. Keith also dug off spillway where the beavers had dammed. Sam had dug off spillway earlier this morning. The beavers are very busy creatures or either there are lots of them.

From time to time we see Turkeys that have been put out by the government. Sam said 3 one morning + 5 that evening at the farm. Then, a few days later he said he saw 13 going from set out pines in north field over to Herbert's place (Grandma place). They could be a pest if many are raised. They are eating corn.
